KOENIG & BAUER

ttPRINT – Thermal transfer coding

For over 45 years we have been developing and manufacturing high quality coding technology products at our site in Veitshöchheim, Germany. Our focus is on first-class quality, outstanding performance and all this in combination with unbeatable reliability. We're on it.

Thermal transfer printers (TTO) are ideal for high-resolution print quality on flexible packaging materials such as tubular bags, tray seals, films, folding boxes and labels.

ttPRINT printers are designed for installation in labelling and packaging machines in any application. The comprehensive Koenig&Bauer Coding portfolio offers the right printing system for your needs in consideration of your specific coding requirements.

Versatile, irrespective of industry

Sweets & savoury snacks

Print just-in-time expiration dates, batch numbers, and codes on your product packaging such as tubular bags, tray seals, foils, folding boxes, and labels. If required, you can easily add your special coding campaigns.

Foods

Enjoy unrestricted flexibility with coding directly at the manufacturing location, for instance on moulding or thermoforming machines. Variable data printing adjusts directly to your coding needs, including multi-lane printing and cyclical printing.

Fresh foods

Down to the time of a second, coding of your packaging ensures you always have optimal traceability for your products. Create largeformat print images — such as ingredient lists — and print them in high resolution and at high speed.

ttPRINT printers code perfectly in many industries and on a wide variety of materials and surfaces.

Soft drinks and pouches

The perfect print image for your code on flexible packaging foil integrates seamlessly into your product design for brand positioning.

Cosmetics and drugstore items

Precise and elegant coding with thermal transfer printing goes hand in hand with your high-quality brand design. Master your label and packaging coding with distinction.

Pharmaceuticals

Synchronise frequently changing datasets from your database with the printer. Always print up to date alpha-numeric characters and 1D and 2D codes and secure the process for your track & trace requirements.

50 device variations

guarantee a wide range of different applications

Simple handling and excellent operational security provide an

uptime > 99%

In comparison to other technologies, low equipment investments and inexpensive colour foils generate

Would you like to integrate your printer into your packaging machine?

The ttPRINT is very well suited for cycled and continuous production systems such as horizontal/vertical tubular bag machines, and thermoforming and tray sealing systems. Standard brackets are designed for any common packaging and labelling machine.

Do you require economical investments for your coding?

With ttPRINT, you'll receive a perfect printed image and reduce consumable costs thanks to the foil saving feature integrated into the printer. This increases your number of potential prints, and delays replacement of your ink ribbon.

In a nutshell.

Would you like to handle large-format printing – such as ingredients lists – with outstanding quality?

The ttPRINT offers print shop quality printing at 300 dpi resolution. Print lists of ingredients by yourself on your tubular bags. Reach new levels of flexibility and save money by reducing your warehousing costs.

Do you maintain production facilities domestically and abroad?

We offer a competent service and engineering team worldwide. Our international organisation receives outstanding ratings in our customer surveys for its handling of globally networked applications.

Are you looking for more flexibility in your print image designs?

Whether you want to print dates, times, counter functions, graphics, logos, symbols, or codes — print with precise detail and excellent reliability. The variety of printer variations available offers the best performance for any application.

Do you want to integrate your coding into your network?

With the right interfaces, it's easy to integrate and monitor the ttPRINT using your company's own network. Send your printed image to your Koenig&Bauer Coding ttPRINT from any PC.

Easy integration into labelling and packaging machines

Exchange cassettes

- for quick foil exchanges
- offer true flexibility for a wide variety of foil colours including specialised colours
- · simplify handling
- shorten your set-up times

Protection class IP 65

Optimal protection against dust and splash water offered by Option IP 65 for ttPRINT 53, 107 and 128. Simply exchange the colour ribbon cassette for a cleaning cassette to clean the device with water jets.

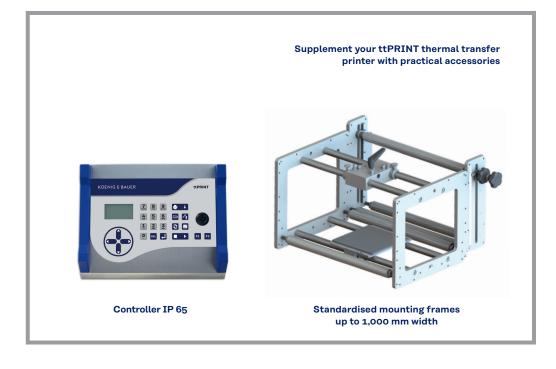

The exchange can be completed in a few seconds. The electronics are protected with a separately secured controller.

Standardised mounting frames

For simple integration into current packaging and labelling machines, a wide variety of widths up to 1,000 mm are available in the standard version. We can also manufacture customerspecific mounting frames upon request.

Software

- Different software programs can be used for controlling, including Labelstar Office, Nice Label, Codesoft, etc.
- ConfigTool configuration software
- Windows printer drivers (WIN7, WIN8, Win 8.1, WIN 10)
- Zebra simulation program (ZPL)

to choose ttPRINT

01

Low consumption combined with low prices means you save money.

02

Excellent uptime of over 99 % provides true production reliability.

03

Easy integration into all current labelling and packaging machines provides more flexibility.

04

A comprehensive portfolio of ribbons let you react flexible to customer requests and increases customer loyalty. 05

A competent global sales and service team supports you at any time.
